PROJECTS

Heaven's Kitchen website, [Link](#)

Aug 2024 - Oct 2024

- HTML, CSS, JavaScript, PHP, and SQL for the backend.
- Developed a dynamic food ordering website with dedicated panels for admins and chefs. The admin panel includes features for sales tracking, customer feedback management, and menu updates, while the chef panel enables real-time order tracking and dish availability updates. The platform ensures seamless coordination between customers, chefs, and administrators for efficient order management.

Quizzel Quiz Game Website, [Link](#)

Feb 2025 - Apr 2025

- HTML, CSS, JavaScript, PHP, and SQL for the backend.
- Developed an interactive quiz platform featuring user authentication, category selection, and dynamic scoring. Implemented real-time feedback and a live auto-refreshing leaderboard tracking top 10 players. Designed a reward system based on performance, stored in a relational database with 4 tables. Built a secure admin panel to manage users, categories, and questions, with registration analytics. Ensured full responsiveness across devices. Key Achievement: Integrated dynamic trophy rewards and real-time updates without page reloads.
